

SC Assignment 2 (Mapping C02)

Compare Artificial Neural Network & Fuzzy Logic

Artificial Neural Network	Fuzzy Logic
① This system can not be easily modified.	① This system can be modified easily.
② It trains itself by learning from a dataset.	② Everything must be defined explicitly.
③ It helps to perform predictions.	③ It helps to recognize patterns.
④ Difficult to extract knowledge.	④ Knowledge can be easily extracted.
⑤ It is based on learning.	⑤ It is not based on learning.
